

Satair Market

A large commercial airplane is centered in a vast hangar, its cargo doors open. The hangar's interior is illuminated by numerous bright lights, creating a high-contrast scene. To the left, a large jet engine is visible on a stand. To the right, a yellow maintenance platform is positioned near the aircraft. The hangar's structure, with its complex steel truss system, is visible in the background. Safety signs are posted on the right wall.

USER/INSTALLER RESPONSIBILITIES

This certificate does not automatically constitute authority to install the item(s).

When the user/installer performs work in accordance with the regulations of an airworthiness authority different than the airworthiness authority specified in block 1, it is essential that the user/installer ensures that higher airworthiness authority approvals apply from the appropriate authority specified in block 1.

Statements in blocks 13a and 14a do not constitute installation certification. In all cases aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the responsible person in accordance with the law.
