

## TOOL RECERTIFICATION CAPABILITY LIST 2025

Satair provides you with the access to a wide range of Tools repair capabilities, always with the latest technical standard and ready for immediate use. Today Satair offers you more than 2400 different tool part numbers. We are regularly expanding our portfolio based on the new Programs, AMMs, SRMs, SBs as well as all other specific and non-specific repair and maintenance tasks. Below you will find our latest list of Proprietary and Vendor Tools that we offer to repair and recertify.

Please contact us for a repair quote and availability check before placing an order. Note: repair orders must be processed manually by the respective team as any order placed via SPEC or through the Spares Portal is automatically processed as a sales order by our system.

The prices mentioned below refer to a standard recertification and exclude any repair works. These will always be subject to inspection and quotation and our team will inform you accordingly.

If there is any specific task or tool which you would like us to add to our program, please contact us and we will look at the possibility of expanding our repair capability for you.
