

Satair Market

A large commercial airplane is positioned in the center of a vast, high-ceilinged hangar. The aircraft's cargo doors are open, and it is surrounded by various maintenance equipment, including yellow scaffolding and large jet engines. The hangar's interior is illuminated by numerous bright lights, and the structural steel beams of the roof are visible. On the right side of the hangar, several safety signs are posted on the wall.

USER/INSTALLER RESPONSIBILITIES

This certificate does not automatically constitute authority to install the item(s).

When the user/installer performs work in accordance with the regulations of an airworthiness authority different than the airworthiness authority specified in block 1, it is essential that the user/installer ensures that his/her

airworthiness authority always refers to the appropriate authority specified in block 1.

Statements in blocks 13a and 13e do not constitute installation certification. In all cases aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the

competent authority for aircraft type to be fitted.
