

AIRBUS SATAIR

TOOL LEASE CAPABILITY LIST 2026

Satair provides you with the access to a wide range of Tools on lease basis, always with the latest technical standard and ready for immediate use. Today Satair offers you more than 6300 different tool part numbers. We are regularly expanding our portfolio based on the new Programs, AMMs, SRMs, SBs as well as all other specific and non-specific repair and maintenance tasks. Below you will find our latest list of Proprietary and Vendor Tools that we offer on a lease basis.

The Loan offer is valid while stock is available, but please note lease orders are filled on a first ordered - first filled basis.

Please contact us for a lease quote and availability check before placing an order. Note: lease orders must be processed manually by the respective team as any order placed via SPEC or through the Spares Portal is automatically processed as a sales order by our system.

If there is any specific task or tool which you would like us to add to our program, please contact us and we will look at the possibility of expanding our lease stock for you.
